SUMMARY

Data and Software Analyst with experience in building and deploying Python-based automation, APIs and dashboards. Skilled in working with NLP models, Docker, and data pipelines, with exposure to Generative AI lifecycle tasks such as prompt engineering and model deployment. Proficient in Python, SQL, and Power BI, with a strong analytical mindset for solving complex operation challenges.

PROFESSIONAL EXPERIENCE

Python Developer

Feb 2025 – Present

Nebula Platforms, Scarborough, ON

- Developer and deployed Python-based automation scripts to replace manual, repetitive tasks, improving process accuracy by 45% and enhancing data governance standards.
- Enhanced error handling and logging mechanisms, enabling a 90% automation accuracy rate over time through continuous refinement and monitoring.
- Leveraging insights from the dashboard to optimize automation processes and reduce error recurrence, contributing to improved operational efficiency and a measurable increase in company revenue.
- Designed dashboards to monitor failed automation processes, enabling data cleanup, error tracking, and continuous improvement aligned with system integration goals.

Python/Java Tutor (Part-Time)

Sept 2023 – Present

Scratch Coding 4 kids, Scarborough, ON

- Blissfully conducting engaging Python and Java tutoring sessions for student of varying age groups, simplifying complex programming concepts through relatable, real-life examples and daily activities.

Data Science Intern

Sept 2024 – Feb 2025

Sunspark Canvassing, Mississauga, ON

- Performed data analysis to optimize operational workflows and inventory management processes, improving efficiency by 70%.
- Developed interactive dashboards in Power BI to visualize demand forecasting and trend analysis.
- Assisted in automating data processing workflows using Python and SQL, improving reporting accuracy.

Software Developer (Backend)

May 2022 – June 2023

Kabra Logistics, Ahmedabad, India

- Optimized backend processes, enhancing system performance by 30%, and collaborated with cross-functional teams to deliver solutions aligned with business goals.
- Managed and optimized backend databases (SQL, MongoDB), ensuring smooth data processing for reporting.
- Collaborated with stakeholders to understand business data needs and enhance data retrieval processes.

Research Intern

Jan 2022 – April 2022

Bhaskaracharya Institute for Space Application and Geo-informatics, Gandhinagar, India

- Refined reinforcement learning models for autonomous vehicles, using Python to analyze large datasets and improve decision-making accuracy.
- Analyzed large datasets, applied statistical methods, and refined reinforcement learning models for improved accuracy in decision-making.

Software Developer Intern

Aug 2021 – Dec 2021

Information and Library Network Center, Gandhinagar, India

- Built and optimized a multi-modular API system using (JavaScript) Node.js, Express.js and Typescript.

- Programmatically extracted data using APIs and optimized transformations for large SQL database.
- Handled project version and deployment using version control service like github.

SKILLS

Core Technical Skills: Python, SQL, Power BI, Tableau, Advanced Excel, Data Modeling, Data Governance, Workflow Automation, MongoDB, Pandas, Numpy

Soft Skills: Analytical Thinking, Problem Solving, Data Integrity, Cross-Functional, Collaboration, Communication

EDUCATION

Loyalist College, Toronto, ON

May, 2023 - Dec, 2024

*Ontario College Graduate Certificate, 3.55 GPA
Artificial Intelligence and Data Science*

Birla Viswakarma Mahavidyalaya Engineering College, Gujarat, India

June, 2018 - May, 2022

*Bachelors of Technology in Information Technology, 9.73 GPA (Gold Medalist)
(Equivalent to Computer Science/Software Engineering)*

PROJECTS & EXTRACURRICULAR

Mockmate

Sept, 2024 – Dec, 2024

- **Optimized voice transcription:** Developed and fine-tuned speech-to-text NLP models, achieving ~11% Word Error Rate(WER) and deployed using Docker for scalability and implemented API endpoints for model interaction and result retrieval. Applied prompt engineering principles to structure for NLP models, enhancing output accuracy and user relevance.
- **Improved deployment efficiency** by creating Docker setups and configuring multiple workers for faster API responses.
- **Designed Dashboard** to show visual reports using Power BI and Python libraries (Matplotlib, Seaborn) to present user's interview result over time.
- **Documented Change** and presented progress to stakeholders, demonstrating strong communication and collaboration skills.

Skills: Speech-to-Text, NLP, Docker, Requirement Gathering, Technical Documentation, Process Improvement, Agile

Netflix Dashboard

Jan, 2024 – Jan, 2024

- **Dashboard creation:** Designed an interactive Tableau dashboard to analyze Netflix's content trend, showcasing top 10 genres, ratings, descriptions, and release trends.
- **Insights:** Provided clear visual insights into key content patterns, enabling better understanding of Netflix's movie and TV show distribution.
- **Dynamic Filter:** Integrated dynamic filters to enhance data exploration, ensuring a user-friendly and insightful experience.

Skills: Tableau, Data Visualization, Dashboard Design, Data Exploration, Analytical Thinking.

Py DocString Pro

Nov, 2024 – Jan, 2025

- Developed a Visual Studio Code extension to automate Python docstring generation, enhancing code documentation efficiency.
- Implemented command palette integration and customizable shortcut keys for seamless user experience.
- Published the extension on the VS Code marketplace and GitHub, providing extensive documentation, setup instructions, and troubleshooting guides

Skills: Typescript, API Integration, Debugging, Software Development, Documentation.
